A technical drawing of a circular device, possibly a valve or a sensor, with various components labeled with numbers 13 through 30. The drawing shows a cross-section of the device. A large circular flange (13) is at the bottom. A central vertical shaft (14) passes through the center. A circular component (15) is mounted on the shaft. A horizontal pipe (16) connects to the side of the shaft. A small circular component (17) is at the end of the pipe. A larger circular component (18) is at the bottom of the pipe. A small circular component (19) is at the end of the pipe. A small circular component (20) is at the end of the pipe. A small circular component (21) is at the end of the pipe. A small circular component (22) is at the end of the pipe. A small circular component (23) is at the end of the pipe. A small circular component (24) is at the end of the pipe. A small circular component (25) is at the end of the pipe. A small circular component (26) is at the end of the pipe. A small circular component (27) is at the end of the pipe. A small circular component (28) is at the end of the pipe. A small circular component (29) is at the end of the pipe. A small circular component (30) is at the end of the pipe.
